## SUMMARY

---

Throughout my career, I have built a strong background in SAP ABAP/PI projects, in the past years I worked in different projects using all capabilities from Integration Suite in new developments or migration and upgrade projects. Based on that, I became an Integration specialist using SAP API Management, Cloud integration and Event Mesh.

I am skilled in solving complex technical problems and delivering high-quality solutions that meet clients' business needs. In my previous roles in Brazil and Portugal, I collaborated with international teams to successfully implement and maintain SAP/web solutions across different industries and teams across the world.

In addition to my technical expertise with SAP products(ABAP, PI/PO/CPI and BTP) and I do some solutions to help internal teams to boost productivity and performance using technologies like Node.js and python, I am a motivated and fast learner who adapts quickly to new environments.

## EXPERIENCE

---

### **DXC Technology 09/2025 – Present**

**Lisbon, Portugal - Remote**

#### **SAP Consultant**

- Co-Leading migration from SAP PO to SAP Integration Suite using migration tool and custom templates;
- Custom templates created to help customers to monitor the whole integration eco-system.
- Custom tools developed to support migration and management using python;
- Set best practices when creating a new integration flow or API;

### **Capgemini 06/2025 – 10/2025**

**Brazil - Remote**

#### **SAP Consultant**

- S4HANA greenfield implementation using SAP RAP;
- Integration with external systems and providers using SAP Integration Suite and Event Mesh;
- Partner Enablement solution implementation, integrating invoices between S4HANA, SAP DRC (BTP) and governments partners;
- API Management rules to handle and manage requests across systems.
